

I support petition RM-10782 to give technician plus privileges to current technician license holders. I would go even further and include all general class CW privileges except 20 meters.

I have been an amateur radio operator since 1955. My favorite mode is morse code. While I recognize this mode may not be as useful as it once was, I believe it can still play a vital role in certain emergency situations. Providing encouragement and incentive for new amateurs to learn the code is the best way to insure a pool of operators with at least minimal skills in this mode of communications.
